

For those who want to manage their contracts more efficiently in Gridlex Zip, this guide provides a clear set of steps to either hide or delete them as needed.

Step 1: Log in to your Gridlex App Suite account and click on the "Contracts" option under the Zip tab.

Step 2: Once you are on the contracts page, locate the three dots icon on each column. Clicking on this will reveal a dropdown.

Note: The "Action" column is enabled by default. To locate the Hide and Delete options, you'll need to scroll towards the extreme right of the page.

For more in-depth guidance, read this guide on [how to utilize the listing page to view data](#).

The screenshot shows the Gridlex interface with the 'Contracts' page selected. A dropdown menu is open over the table, showing options for sorting (Ascending/Descending) and columns. The 'Columns' section is expanded, showing a search bar and a list of available columns. The 'Action' column is not yet selected.

Contract ID	Contract Name	Contract Start Date	Contract Signature and Execution Date	Contract End Date	Contract Template Name	Contract Due
118902806680372...	Distribution Agreement					
118902533597628...	Quality Control Contracts					
11890214139161559...	Drug Testing Contract					

Step 3: In the dropdown, search for the “Action” option. Click “Apply” to add the Action column to your view.

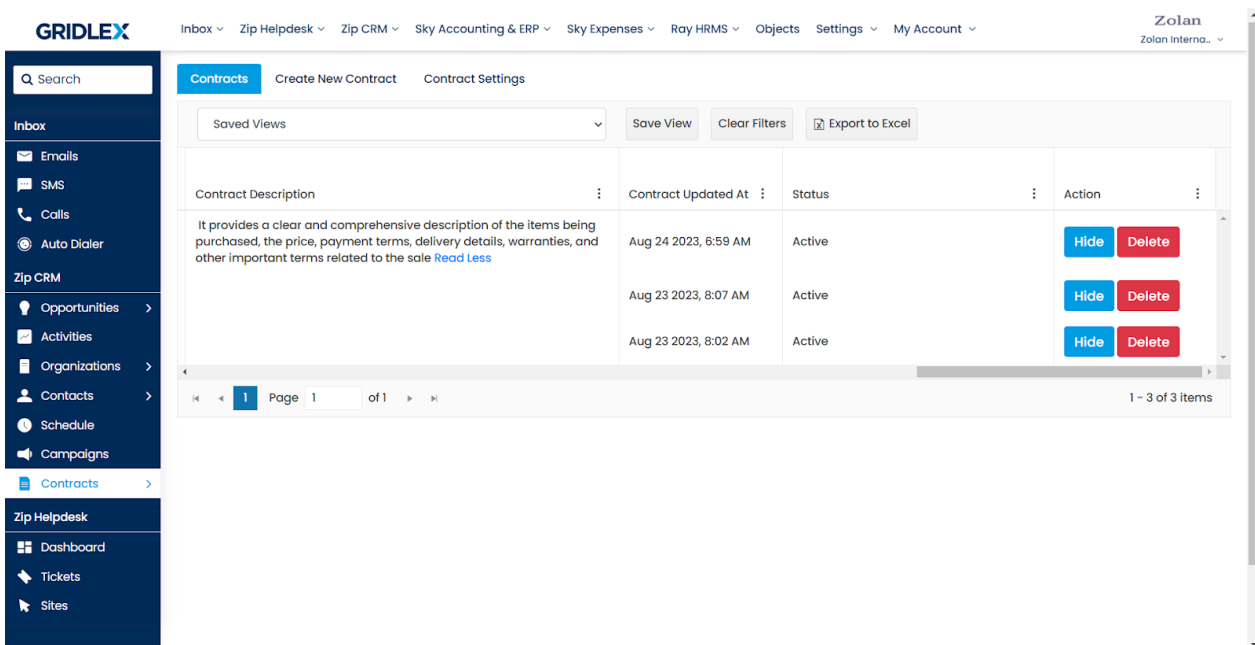

The screenshot shows the same Gridlex interface, but now the 'Action' column has been added to the table. The dropdown menu is still open, and the 'Action' option is selected. The table header now includes the 'Action' column.

Contract ID	Contract Name	Contract Start Date	Contract Signature and Execution Date	Contract End Date	Contract Template Name	Contract Due	Action
118902806680372...	Distribution Agreement						
118902533597628...	Quality Control Contracts						
11890214139161559...	Drug Testing Contract						

Step 4: Look towards the extreme right side of your screen. You'll find a newly added column labeled “Action”. In this column, you’ll see two options: “Hide” and “Delete”.

Click on the desired action for the specific contract you wish to manage:

- **Hide:** This will remove the contract from the default view but won't delete it.
To view contracts that you've hidden, look for the "saved views" option at the top of the page. From the dropdown menu, select "hidden contracts" to see all contracts that have been set to hidden.
- **Delete:** This will permanently remove the contract. Please be sure before deleting.
It's vital to act with caution when choosing to delete contracts. Once a contract has been deleted, it cannot be restored or retrieved.

If you need any help with any feature, data migration of your old data, or anything at all, just email apps@gridlex.com and our team will be here to help you. Remember, that one of **Gridlex's** core values is Customer Success. We want you to be successful.
