

Follow the below steps to edit unit permissions in Gridlex App Suite.

Step 1: Log in to your Gridlex App Suite account and click on the "Enterprise Admin Settings" option under the Enterprise Admin tab.

Step 2: From the left navigation bar, select "Units."

Step 3: Select the unit you want to add users for.

Step 4: Click on the "MDM - Permissions" tab.

Step 5: Add permissions for all the sections by checking the checkboxes. Once done, click "Save."

Note: By default, these permissions are enabled only for enterprise admins. So, be extremely cautious while giving these exclusive permissions to units.

If you need any help with any feature, data migration of your old data, or anything at all, just email apps@gridlex.com and our team will be here to help you. Remember, that one of **Gridlex's** core values is Customer Success. We want you to be successful.
