

Gridlex Ray offers leave and attendance management which is an important feature as it allows employers to efficiently manage employee absences, ensure compliance with labor laws and company policies, and maintain accurate attendance records. This feature can also help in automating leave approvals and calculations, improving overall productivity and reducing errors in record-keeping. Additionally, it enables employees to track their own attendance and leave balances, and makes it easier for managers to plan resources and ensure adequate coverage.

If you need any help with any feature, data migration of your old data, or anything at all, just email apps@gridlex.com and our team will be here to help you. Remember, that one of **Gridlex's** core values is Customer Success. We want you to be successful.
